Helen McKenna sits down with Marvin Rees, the Mayor of Bristol, to explore his approach to place-based leadership, the NHS's role as a 'place-shaper' and the city's experience of Covid-19. The second wave of Covid-19 offers new as well as ongoing challenges for the health and care system ...

Offers the health care professional with the information to answer the 'what, where, how, and when' questions that come up when transforming a health care practice idea into a successful business. This book is suitable for master and doctorate level students preparing for the professional world.

Unlike other texts, Business Fundamentals for the Rehabilitation Professional answers the "what, where, how, and when" questions of transforming a health care practice idea into a successful business. Designed to integrate small business guidelines with health care regulations, practice operations, and management, this text is perfect for rehabilitation professionals and entrepreneurs interested in starting up or expanding their practice businesses. Tammy Richmond, MS, OTRL, and Dave Powers, MA, MBA, PT, answer the "how-to" questions necessary to successfully own and operate a rehabilitation practice. Helpful worksheets and review questions are utilized to prepare readers in identifying business opportunities, legal and health care regulatory issues, conducting market research, and health care operation implementation. Health care professionals will learn how to create vision and mission statements, develop business and marketing plans, and manage their finances all within the understanding of their scope of practice; local, state, and federal regulations; and small business guidelines. Effective tools and templates are included in each chapter to scale the reader's learning objectives against actual business examples. Input from experienced health care professionals and small business experts is also included to reinforce important aspects in properly executing a successful health care practice. Features: Market research worksheet Comparison of legal structures Business plan template Marketing plan worksheet Start-up tasks checklist Financial bookkeeping schedule Business success chart Practical tips

Emphasizes the development of clinical reasoning skills, describing the components of the evaluation process and addressing how to decide what to evaluate. Covers a broad array of common diagnoses seen in hand therapy, including shoulder and elbow disorders, peripheral nerve problems, wrist and hand fractures, tendonitis and tendonosis, finger sprains and deformities, tendon injuries, arthritis, burns, infections, ganglion cysts, stiffness, Dupuytren's, and pediatric and geriatric hand problems. Diagnostic-specific information and treatment guidelines follow a consistent format: Overview Diagnosis and pathology Timelines and healing Anatomy Treatment (non-operative and/or operative) Questions to ask the doctor What to say to clients Evaluation tips Diagnosis-specific information that affects clinical reasoning Tips from the field Precautions and concerns Role of therapy assistants Case examples Offers topics to use as mental prompts when working in the clinical setting: Questions to ask the doctor What to say to clients Tips from the field Precautions and concerns Over 400 illustrations in the text and on the CD demonstrate important concepts. Case studies in the common diagnoses chapters demonstrate the use of clinical reasoning and highlight the "human" side of each client encounter. Clinical pearls and precautions share advice from the author and contributors, learned from years of clinical experience. Describes the role of the therapy assistant with the client, showing how the therapy assistant may be included in the therapy process. Glossary includes key terms from the text, offering easy access to definitions of key terms. CD provides samples of hand therapy exercises and clinical forms that may be used with clients.

This basic handbook on how to start up a private physical therapy practice is a hands-on guide for any physical therapist who is contemplating or preparing to go out on his/her own. Starting & Managing Your Own Physical Therapy Practice is a one-of-a-kind guide that offers insight into the how's, what's, and where's of private business and gives the practitioner enough information and insight to veer him/her in the proper direction. This book is a guide map, a tool developed to open your eyes to what is necessary to open and run your own, successful practice.

This definitive work, the combined effort of 30 international contributors, provides in-depth discussion of neuropsychological rehabilitation, the consequences of brain injury, fundamentals of recovery, current rehabilitation models, and treatment. Remarkable in the depth of its content, this publication reveals the numerous changes that have occurred over the past decade and the new pathways open to treating TBI. Experts from the United States and Europe detail the consolidation of neuropsychological rehabilitation as an interdisciplinary field with strong clinical and applied roots. The material explores the foundations which support and direct treatment, and it combines those foundations with a vision of the current state of the most innovative methodologies (e.g., gene therapy, post-traumatic sleep disorder intervention, neural transplants).

Be prepared for the growing opportunities in community and population health practice with the 3rd Edition of this groundbreaking resource. The New Edition reflects the convergence of community and population health practice with expanded content on health promotion, well-being, and wellness. Drs. Scaffa and Reitz present the theories underpinning occupational therapy practice in community and population health. Then, the authors provide practical guidance in program needs assessment, program development, and program evaluation. Both new practitioners and students will find practice-applicable coverage, including expanded case examples, specific strategies for working in the community, and guidance on securing funding for community and population health programs.

With more than 1,000 study and review questions, Saunders Q&A Review for the Physical Therapist Assistant Board Examination provides the practice you need to succeed on the National Physical Therapy Examination (NPTE) for Physical Therapist Assistants. Questions simulate the format of the NPTE, in terms of content and the proportional breakdown of topics, and include rationales along with page references to physical therapy textbooks. Written by physical therapy specialist Brad Fortinberry, this book also includes a companion website offering unlimited test-taking practice plus instant feedback. 1,385 multiple-choice questions reflect the format, content, and proportional question breakdown of the National Physical Therapy Examination (NPTE) from the Federation of State Boards of Physical Therapy (FSBPT) as well as the terminology from the Guide to Physical Therapist Practice. Review and study features address the role of the Physical Therapist Assistant, focusing on the clinical application of knowledge, concepts, and principles necessary in providing safe and effective patient care consistent with best practice, and include system-specific questions on the musculoskeletal, neuromuscular, cardiovascular/pulmonary, integumentary, and other systems. Practice tests mimic the NPTE, helping you prepare for the NPTE with confidence. Electronic test-taking option enables students to create an unlimited number of unique practice tests, and receive instant feedback for answers. Rationales for correct answers include textbook references to help in preparing for the certification exam. Timed format for sample tests simulates the actual examination experience and strengthens your prioritization and time-management skills. Content experts provide knowledge and insight across every specialty area covered on the exam, for a reliable, well-rounded review.

Count on this complete guide to setting up and managing an optometric practice! Business Aspects of Optometry covers everything related to the business side of a practice — such as selecting a location and staff, equipping the office, office administration and personnel management, marketing, options for a specialty practice, controlling costs, billing and reimbursement, risk management, and financial planning. To succeed in practice, this is the one resource you need! Unique! Expert authors are practice management educators who teach the course in optometry schools. A logical organization makes it easy to find practical information on managing your own practice or purchasing your own practice. Coverage of different types of ownership includes self-employment, individual proprietorships, partnerships, and corporations. Coverage of cost control issues compares the selection and use of an optical laboratory versus an in-house finishing lab. Risk management and insurance coverage provides an overview of personal, life, liability, and disability insurance. Coverage of financial planning and tax reporting discusses topics including IRAs, retirement plans, estate planning, and personal and business tax issues. Bulleted lists, tables, figures, and boxes

help you locate valuable information quickly. Checklists provide a logical progression in completing tasks. NEW chapters expand the book's scope of coverage, and include these topics: Personal and professional goal setting Resumes and interviews Debt management Principles of practice transfer Ethics Quality assurance Specialty practice Vision rehabilitation Coding and billing Financial decision making Exit strategies

Medical training is a difficult journey with enormous amounts of information to absorb over a short time period. The intense time commitment required during this process leaves little opportunity to study any other discipline. However, even the most intelligent and well-intentioned provider cannot care for patients if the front door of the building is closed. Simply put: A fundamental background in business is required to effectively practice medicine. Eye care professionals, which includes their ophthalmic staff, can now fill the critical gap in their education with Essential Business Fundamentals for the Successful Eye Care Practice, providing them the necessary basic tools to make and execute winning practice management decisions. Writing in a high-density format that medical professionals will be familiar with, Dr. Savak Teymoorian combines his physician training and experience as a successful ophthalmologist at Harvard Eye Associates with the knowledge acquired earning his MBA. This unique perspective allows him to provide the proper theory and execution in the business of eye care and present it in an efficient manner like that used in medical education. Each chapter is dedicated to a different subject that would routinely be taught in a masters of business administration degree, tailored specifically for eye care professionals and distilled into the most critical information for a strong foundation. Each section is further enhanced with real life examples seen in ophthalmic care showing how to properly apply business strategies and tactics to obtain the best results. Chapter topics include: Marketing Leadership Negotiations Operations Finance
