WAEC in Review is a practical intervention strategy in transforming the weakening educational system of Liberia where academic excellence is unceasingly diminishing. LIPACE Pilot Study Guide is not only a landmark achievement in the educational history of Liberia but a remarkable strive towards the proper preparation of Liberian students for future diets of the WAEC exam. As a member of the National Committee of the West African Examinations Council and a Stakeholder in the Liberian Education System, I wish to recommend the use of this study guide to adequately prepare each and every Liberian student for future examinations thereby setting the stage for an easy transition to the emerging West African Senior Secondary Examinations (WASSCE). I am explicitly confident that you will definitely find your journey through this guide very rewarding as you prepare to sit the next WAEC Exam. David S. Massaquoi, Sr., director of Education, The Salvation Army/Liberia Command Education Secretariat Our students sit the exam in constant fear of proctors and supervisors. They know nothing about the exam and its structure and this fear lead to them failing massively. We need to build the confidence level of our students and help them to study hard and understand the roles of proctors and supervisors to stop the intimidation during the exam. Thanks to LIPACE and the "Turning the Tide" project, we have helped our students achieved an amazing achievement for the first time in the history of Gbarpolu County where all senior students successfully passed the exam. Lartey Bemah, principal of Bopolu Public School (2012-2013), Gbarpolu County, Liberia

An award-winning professor of economics at MIT and a Harvard University political scientist and economist evaluate the reasons that some nations are poor while others succeed, outlining provocative perspectives that support theories about the importance of institutions.

An understanding the political economy of Nigeria is needed to reveal the root causes of its many ethnic, religious, economic, and political problems and to address them for the long term. The pressures now weighing on Nigeria could literally fracture the state along deep fault lines if rampant corruption and partisanship continues. As mutually important partners for both of our interests in Africa, the United States should assist in specific but indirect ways to help Nigerians overcome their political economic problems. Within such assistance, the role of the U.S. military is particularly delicate but needed through focused aid to specific programs and sharing of expertise, all best managed through employing units that are regionally aligned to Nigeria or West Africa.

Perceptions of Africa have changed dramatically. Viewed as a continent of wars, famines and entrenched poverty in the late 1990s, there is now a focus on "Africa rising" and an "African 21st century." Two decades of unprecedented economic growth in Africa should have brought substantial improvements in well-being. Whether or not they did, remains unclear given the poor quality of the data, the nature of the growth process (especially the role of natural resources), conflicts that affect part of the region, and high population growth. Poverty in a Rising Africa documents the data challenges and systematically reviews the evidence on poverty from monetary and nonmonetary perspectives, as well as a focus on dimensions of inequality. Chapter 1 maps out the availability and quality of the data needed to track monetary poverty, reflects on the governance and political processes that underpin the current situation with respect to data production, and describes some approaches to addressing the data gaps. Chapter 2 evaluates the robustness of the estimates of poverty in Africa. It concludes that poverty reduction in Africa may be slightly greater than traditional estimates suggest, although even the most optimistic estimates of poverty reduction imply that more people lived in poverty in 2012 than in 1990. A broad-stroke profile of poverty and trends in poverty in the region is presented. Chapter 3 broadens the view of poverty by considering nonmonetary dimensions of well-being, such as education, health, and freedom, using Sen's (1985) capabilities and functioning approach. While progress has been made in a number of these areas, levels remain stubbornly low. Chapter 4 reviews the evidence on inequality in Africa. It looks not only at patterns of monetary inequality in Africa but also other dimensions, including inequality of opportunity, intergenerational mobility in occupation and education, and extreme wealth in Africa.

Taxes are a constant part of life for every company and a constant element of economics, finance, and financial law. Any changes observed in the science and theory also apply to the importance and position of taxes in the practice of corporate finance, public finance, and economic growth. Beside this, a new meaning of taxes in the economies of countries in the world and the European Union is introduced. Taxes will always introduce risks and uncertainties in business, due to the high volatility and uncertainty of tax law. Moreover, being a category that affects the economic growth, they cause disturbances in stability and welfare of the state. Therefore, while considering the essence of taxes in a country, one should not consider this category in isolation from corporate finance and social welfare. Two things are certain in the world: death and taxes.

Educationeering describes the author's areas of professional can academic concern for the past 55 years. Educationeering can be defined as directing the triple academic functions of Research, Teaching and Responsive Social Engagement towards the education challenges of society. Prof. Obanya is an international Education Strategist and his original ideas are widely discussed throughout Africa.
