This work offers a state-of-the art survey of information systems research on electronic customer relationship management (eCRM). It provides important new frameworks derived from current cases and applications in this emerging field. Each chapter takes a collaborative approach to eCRM that goes beyond the analytical and operational perspectives most often taken by researchers in the field. Chapters also stress integration with other enterprise information systems. The book is organized in four parts: Part I presents an overview of the role of CRM and eCRM in marketing and supply chain management; Part II focuses on the organizational success factors behind eCRM implementation; Part III presents cases of eCRM performance enhancement; and Part IV addresses eCRM issues in business-to-consumer commerce.

Essay from the year 2011 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 80, De Montfort University Leicester (-), course: E Business, Language: English, abstract: Introduction With the dynamic nature of the global business environment and increasing competitive pressure, organizations are shifting from product-focused strategy to consumer-focused strategy. With the advent of internet, consumers are becoming more knowledgeable and more aware of the various opportunities available to them. The internet has provided easy access to new products and access to more options leading to an expanded competitive advantage for the consumers, greatly enhancing their choices, value and pricing flexibilities in many cases. Customer retention and loyalty has become a nightmare to many organizations, and organizations are now involved in what can be termed 'a relationship competition' between organizations and their clients, as customers can switch from one product to the other at the click of the computer mouse. In order to counter this phenomenon organizations are investing heavily in technologies enabling a customer-focused relationship marketing strategy. With tremendous growth in e-business and web-based services, organizations are therefore shifting to an internet based customer relationship management, hence the birth of electronic customer relationship management (E-CRM). In this report a comprehensive analysis of how IBM uses electronic customer relationship management (eCRM) to gain insight and understanding of their customer's needs and want is carried out and also how to improve customer's relationship by satisfying those needs. [...]

Studienarbeit aus dem Jahr 2002 im Fachbereich BWL - Customer-Relationship-Management, CRM, Note: 1,0, Hochschule Ludwigshafen am Rhein (FB II), Veranstaltung: Vertriebsmanagement und Electronic Commerce, Sprache: Deutsch, Abstract: Diese Arbeit beschäftigt sich mit dem Electronic Customer Relationship Management (im folgenden eCRM) im Sinne von Kundenbeziehungsmanagement im Internet. Es handelt sich dabei um ein derzeit in Wissenschaft und Praxis viel diskutiertes Thema, das durch ständige technische Weiterentwicklungen immer neue Möglichkeiten der Umsetzung bietet. Die Hauptprobleme im Zusammenhang mit eCRM, die in dieser Arbeit beleuchtet werden sollen, sind die Kompatibilität des Internets mit dem Gedankengut des Beziehungsmarketing sowie die konkrete Umsetzung des eCRMAnsatzes in der Praxis. Ausgehend von der Definition der wichtigsten Begriffe dieses Themengebiets wird zunächst anhand der Beleuchtung der Bedeutung des Internet für das Beziehungsmarketing erläutert, was eCRM leisten kann und wo die Voraussetzungen für erfolgreiches eCRM liegen. Anschließend werde ich die verschiedenen Instrumente des eCRM auch anhand von aktuellen Beispielen aus der Praxis vorstellen. Vor allem wegen der Möglichkeit des Zugangs zu den Praxisbeispielen konzentriert sich diese Arbeit auf den Business-to-Consumer-Bereich. Auf eine nähere Erläuterung der technologischen Grundlagen und eine Vorstellung von Softwarelösungen habe ich bewusst verzichtet, da aus Marketingsicht eher das Konzept und die praktische Umsetzung von eCRM interessant sind. Im letzten Teil der Arbeit soll ein kurzer Ausblick auf zukünftige Entwicklungen in diesem Bereich gegeben werden, vor allem auf das derzeit noch in den Kinderschuhen steckende mCRM auf der Grundlage von mobilen Empfangsgeräten wie Handys. Wenn in dieser Arbeit die Rede von Kunden ist, sind in der Regel sowohl bestehende als auch potentielle Kunden gemeint.

Electronic customer relationship management (ECRM) is a comprehensive business and marketing strategy for attracting and retaining customers over the internet. The proliferation of ECRM and its alarming failure rate call for a better understanding of the relationship between ECRM and its immediate objective. Based on the literature reviewed, there are few studies that have used service quality as a component of relationship quality in the relation between ECRM and customer satisfaction. The study investigates the influence of three components of ECRM (i.e., pre-purchase, at-purchase, and post-purchase ECRM) on customer satisfaction directly and through mediating variable relationship quality. A quantitative methodology using a cross-sectional survey method was used to investigate the relationship between variables.

Recently there has been increased demand for combining locally customized services to the economies of the scale of worldwide operations. In this environment competitiveness calls for integrating the potential of information technology to well functioning global logistics. Information Technology Enabled Global Customer Service combines theoretical consideration and practical experiences in implementing new customer service models.

Diplomarbeit aus dem Jahr 2002 im Fachbereich BWL - Marketing, Unternehmenskommunikation, CRM, Marktforschung, Social Media, Note: 1,7, Verwaltungs- und Wirtschafts-Akademie Düsseldorf (Verwaltungs- und Wirtschaftsakademie Düsseldorf), Veranstaltung: Dplom-Abschlussarbeit, Sprache: Deutsch, Abstract: Das Ziel bzw. die Intention meiner Arbeit ist es, den Nutzen eines CRM / eCRM-Systems für ein Unternehmen herauszustellen. Es soll geprüft werden, ob und wie CRM ein relevanter Wettbewerbsfaktor sein kann und welche Maßnahmen und Instrumente dafür benötigt werden. Dabei wird speziell auf CRM im e-Business eingegangen, da es heutzutage unumgänglich ist, neue Vertriebs- und Kontaktkanäle wie das Internet, Call-Center usw. dem Kunden zur Verfügung zu stellen. Dabei soll verdeutlicht werden, dass eine einheitliche Kommunikation mit dem Kunden über verschiedene Kanäle gestaltet werden kann. Es wird anschließend ein Konzept zur Realisierung und Implementierung einer CRM-Software erläutert. Zum Schluss sei noch der Datenschutz erwähnt, da viele diesen vergessen, es aber ein wichtiger Bestandteil, gerade im Internet, eines CRM-Systems ist. Die Arbeit schließe ich mit meinem Fazit ab.

Discover an important tool in the development of new marketing strategies for satisfying online customers! Edited by two experts in the fields of business and marketing, Customer Relationship Management in Electronic Markets is designed to help you build Internet relationships that lead to customer retention and long-term loyalty.
