Dissolution

The 3D printing (3DP) process was patented in 1986; however, only in the last decade has it begun to be used for medical applications, as well as in the fields of prosthetics, bio-fabrication, and pharmaceutical printing. 3DP or

Acces PDF

Hanson

additive

manufacturing

(AM) is a family of technologies that implement layer-by-layer processes in order to fabricate physical models based on a computer aided design (CAD) model. 3D printing permits the fabrication of high

Acces PDF

Hanson

Dissolution of
degrees of
complexity with
Apparatus
great

reproducibility in a
fast and cost-
effective fashion.

3DP technology
offers a new
paradigm for the
direct manufacture
of individual
dosage forms and
has the potential to
allow for variations

Acces PDF

Hanson

Disolution

Apparatus
in size and geometry as well as control dose and release behavior.

Furthermore, the low cost and ease of use of 3DP systems means that the possibility of manufacturing medicines and medical devices at the point of dispensing or at

Acces PDF

Hanson

the point of use
could become a
reality. 3DP thus
offers the perfect
innovative
manufacturing
route to address
the critical
capability gap that
hinders the
widespread
exploitation of
personalized
medicines for
