"Following on the successes of two previous dictionary projects, the CRC World Dictionary of Plant Names and the CRC World Dictionary of the Grasses, Umberto Quattrocchi has undertaken this dictionary of economically important plants.... He has done for these plants what was so admirably done in his other works—brought the vast and scattered literature on plant names, and in this case, too, their uses, into coherent order so that the inquisitive scholar can get a foothold." —From the Foreword, Donald H. Pfister, Harvard University and Harvard University Herbaria, Cambridge, Massachusetts The CRC World Dictionary of Medicinal and Poisonous Plants: Common Names, Scientific Names, Eponyms, Synonyms, and Etymology provides the starting point for better access to data on plants used around the world in medicine, food, and cultural practices. The material found in the five volumes has been painstakingly gathered from papers of general interest, reports and records, taxonomic revisions, field studies, herbaria and herbarium collections, notes, monographs, pamphlets, botanical literature, and literature tout court. It includes sources available at various natural history libraries, floras and standard flora works, local floras and local histories, nomenclatural histories, and the International Code of Botanical Nomenclature. Much more than a dictionary, the book provides the names of thousands of genera and species of economically important plants, concise summaries of plant properties, and appropriate observations about medicinal uses. Drawing from a tremendous range of primary and secondary sources, it is an indispensable time-saving guide for all those involved with botany, herbal medicine, pharmacognosy, toxicology, medicinal and natural product chemistry, and agriculture.

Complete Atlas of the World, 3rd Edition is now fully revised and updated to reflect the latest changes in world geography, including the annexation of Crimea and the new nation of South Sudan. Bringing each featured landscape to life with detailed terrain models and color schemes and offering maps of unsurpassed quality, this atlas features four sections: a world overview, the main atlas, fact files on all the countries of the world, and an easy-to-reference index of all 100,000 place names. All maps enjoy a full double-page spread, with continents broken down into 330 carefully selected maps, including 100 city plans. You will also find a stimulating series of global thematic maps that explore Earth's place in the universe, its physical forms and processes, the living world, and the human condition. From Antarctica to Zambia, discover the Earth continent-by-continent with Complete Atlas of the World, 3rd Edition.

The CRC World Dictionary of Plant Names, a four volume set, is the most comprehensive work of its kind available today. The reader will find its coverage absorbing and useful. Umberto Quattrocchi, was awarded the prestigious Hanbury Botanical Garden Award for his studies on flowers and gardens.

How did cranes come to symbolize matrimonial happiness? Why were magpies the only creatures that would not go inside Noah's Ark? Birds and bird imagery are integral parts of our language and culture. With her remarkable ability to dig up curious and captivating facts, Diana Wells hatches a treat for active birders and armchair enthusiasts alike. Meet the intrepid adventurers and naturalists who risked their lives to describe and name new birds. Learn the mythical stories of the gods and goddess associated with bird names. Explore the avian emblems used by our greatest writers—from Coleridge's albatross in "The Ancient Mariner" to Poe's raven. A sampling of the bird lore you'll find inside: Benjamin Franklin didn't want the bald eagle on our National Seal because of its "bad moral character," (it steals from other birds); he lobbied for the turkey instead. Chaffinches, whose Latin name means "unmarried," are called "bachelor birds" because they congregate in flocks of one gender. Since mockingbirds mimic speech, some Native American tribes fed mockingbird hearts to their children, believing it helped them learn language. A group of starlings is called a murmuration because they chatter so when they roost in the thousands. Organized

alphabetically, each of these bird tales is accompanied by a two-color line drawing. Dip into 100 Birds and you'll never look at a sparrow, an ostrich, or a wren in quite the same way.

Santa Fe Police Chief Kevin Kerney is back in the tenth and most entertaining novel in Michael McGarrity's acclaimed mystery series. After years away on the pro rodeo circuit, Johnny Jordan struts into Santa Fe to ask his boyhood friend, Santa Fe Police Chief Kevin Kerney, to serve as a technical advisor on a contemporary Western movie to be filmed along the Mexican border. Kerney agrees and plans a working vacation on location, in a remote area of the state known as the Bootheel, with his wife, Lt. Colonel Sara Brannon, and their three-year-old son, Patrick. But, a dead man on the road near an isolated border crossing, a federal undercover investigation into immigrant smuggling, the search for a fugitive from military justice hiding somewhere in Europe, and Johnny Jordan's troublesome behavior all ensure that nothing goes as planned. As separate investigations embroil them in circumstances that will forever change their lives, Kerney must care for Patrick while Sara plays a dangerous game of Pentagon politics. Packed with family secrets, international intrigue, and memorable characters, this is McGarrity's most ambitious and involving novel to date-- traveling an accelerating arc from Santa Fe to the desert grasslands and mountains of the Bootheel, to the most secret levels of the Pentagon, to a resort town on the coast of Ireland, and back to an adrenaline-charged climax on a desolate landing strip a few miles north of the Mexican border.
