International Handbook Of Psychiatry: A Concise Guide For Medical Students, Residents, And Medical Practitioners A Concise Guide for Medical Students, Residents, and Medical Practitioners by Laura Weiss Roberts and Publisher World Scientific. Save up to 80% by choosing the eTextbook option for ISBN: 9789814405621, 9814405620. The print version of this textbook is ISBN: 9789814405607, 9814405604.

This handbook will be a concise guide to important topics in psychiatry with an international focus. It constitutes a précis of the field of psychiatry with emphases on the therapeutic approach to the patient and on the proper diagnosis of major psychiatric disorders. All psychiatric diagnoses are encoded using both the US Diagnostic and Statistical Manual (DSM) and the International Statistical Classification of Diseases and Related Health Problems (ICD). Treatment options for psychiatric disorders will include approaches used in developed nations in North America, Europe, Asia, as well as in the developing world. Furthermore an invaluable brief history of psychiatry allows readers to trace the beginnings of their chosen field and gain awareness of the ethical and legal contexts. This handbook will provide a comprehensive introduction to psychiatry appropriate for students, trainees, and practitioners seeking an international approach. Contents: Impact of Mental Illness (Laura Weiss Roberts, Richard Balon and Joseph B Layde) International Issues in Psychiatry (Richard Balon and Cyril Höschl) Psychiatric Diagnosis (Stephanie Bagby-Stone, Jessica Nittler and John Lauriello) Psychiatric Genetics (Bhanu Prakash Kolla and David Mrazek) Psychiatric Interviewing: What to Do, What Not to Do (Mara Pheister) Psychological and Neuropsychological Testing (Jennifer Niskala Apps and Jonathan E Romain) Psychiatric Disorders in Childhood and Adolescence (Michael Koelch and Joerg M Fegert) Schizophrenia and Other Psychotic Disorders (Peter F Buckley, Adriana Foster and Scott Van Sant) Mood Disorders (Sandra Rackley and J Michael Bostwick) Anxiety Disorders (Leanne Parasram and Dan J Stein) Substance Use Disorders (Nidal Moukaddam and Pedro Ruiz) Cognitive Disorders (Alana Iglewicz, Ipsit V Vahia and Dilip V Jeste) Somatoform Disorders (Christina L Wichman) The Dissociative Disorders (Jean M Goodwin) Sleep Disorders in Psychiatry (Oludamilola A Salami) Eating Disorders (Athena Robinson and W Stewart Agras) Sexual Disorders (Richard Balon) Adjustment Disorder (Mauro Giovanni Carta, Maria Carolina Hardoy and Matteo Balestrieri) Personality Disorders (Joel Paris) Geriatrics (Randall Espinoza) Emergency Psychiatry (Divy Ravindranath, Mark Newman and Michelle Riba) Outpatient Psychiatry (Ondria Gleason, Aaron Pierce and Bryan Touchet) General Hospital Psychiatry (Jen Alt McDonald and Mark T Wright) Psychiatric Education (Linda Gask and Michelle B Riba) Residency Training (Sanjai Rao and Sidney Zisook) Methods of Psychiatric Research (Elizabeth Burgess, Nicolas Ramoz and Philip Gorwood) World Suicide (Morton M Silverman) AIDS Psychiatry (Mary Ann Cohen) Pharmacogenomic Variability Associated with Psychotropic Medication Response (David Mrazek and Bhanu Prakash Kolla) Ethics in Psychiatry (Kristi Estabrook) The Culturally Competent Psychiatric Assessment (Ajoy Thachil and Dinesh Bhugra) Traditional Healing for Psychiatric Disorders (Roger M K Ng, Zhang-Jin Zhang and Wendy Wong) International Perspective on Homelessness (Belinda Bandstra, Anthony Mascola and Daryn Reicherter) Mental Health Consequences of War and Political Conflict (Daryn Reicherter and Rena Sugarbaker) Stigma (Travis Fisher) Legal Aspects of Psychiatry (Joseph B Layde) Readership: Psychiatry students, trainees, and practitioners.

Keywords:Psychiatry;Mental Health;Physician Assistant;Nursing â Practitioner and Advanced Practice;Professional and Technical;Medical;Allied Health Professional;Medical Assistants;Neurology/ Neuroscience;Public Health;Pharmacology/ Pharmacy;Paediatrics;HIV & AIDS Research;Forensic MedicineKey Features:The international focus and the wide international experience of the authors would make the book particularly attractive to students and residents, both in terms of coursework and preparation for formal examinationsFocus on innovative areas of psychiatry such as patient-centered care practices (e.g. in defining the goals of treatment), new therapies (e.g. pharmacogenetic advances), and the approach to special or complex patient populations (e.g. children, elders, medically ill, and terminally ill)The particular strengths of “ Q & A ” sections, self-assessment items, “ clinical pearls ” study guides and the competency-based orientation would set this book apart from others

Geographically and demographically Asia is a huge region with a large number of societies and cultures, each affected by their own unique problems including over-population, major natural disasters, poverty and changing social and economic factors. Inevitably this means that different mental health needs have developed across the region. Colonialism, globalization, industrialization and urbanization have brought major demographic and cultural shifts in the region but clinical mental health practices and services and societal attitudes to mental health issues vary enormously. This handbook surveys the state of the current psychiatric care field across the whole Asia-Pacific region. Focusing on individual countries, each chapter will include: A summary of factors affecting the practice and provision of psychiatric care, including cultural attitudes to mental health issues Coverage of the conceptualisation, causation and prevalence of mental health issues in society An overview of mental health care services and systems available and workforce training Coverage of country specific innovative practices and folk therapies As the first major reference work on psychiatric care in Asia this book is an essential resource for scholars and students researching mental health in Asia as well as psychiatrists and other mental health professionals working in the region.

This handbook shows the wide perspective cognitive-behavioural treatment can offer to health professionals, the vast majority of whom now recognize that cognitive behavioural procedures are very useful in treating many 'mental' disorders, even if certain disciplines continue to favour other kinds of treatment. This book offers a wide range of structured programmes for the treatment of various psychological/psychiatric disorders as classified by the DSM-IV. The layout will be familiar to the majority of health professionals in the description of mental disorders and their later treatment. It is divided into seven sections, covering anxiety disorders, sexual disorders, dissociative, somatoform, impulse control disorders, emotional disorders and psychotic and organic disorders. Throughout the twenty-three chapters, this book offers the health professional a structured guide with which to start tackling a whole series of 'mental' disorders and offers pointers as to where to find more detailed information. The programmes outlined should, it is hoped, prove more effective than previous approaches with lower economic costs and time investment for the patient and therapist.

By drawing broadly on international thinking and experience, this book offers a critical exploration of Mad Studies and advances its theory and practice. Comprised of 34 chapters written by international leading experts, activists and academics, this handbook introduces and advances Mad Studies, as well as exploring resistance and criticism, and clarifying its history, ideas, what it is, and what it can offer. It presents examples of mad studies in action,

## Access Free International Handbook Of Psychiatry A Concise Guide For

covering initiatives that have been taken, their achievements and what can be learned from them. In addition to sharing research findings and evidence, the book offers examples and insights for advancing understandings of experiences of madness and distress from the perspectives of those who have (had) those experiences, and also explores ways of supporting people oppressed by conventional understandings and systems. This book will be of interest to all scholars and students of Mad Studies, disability studies, sociology, socio-legal studies, mental health and medicine more generally.

The Routledge International Handbook of Critical Mental Health offers the most comprehensive collection of theoretical and applied writings to date with which students, scholars, researchers and practitioners within the social and health sciences can systematically problematise the practices, priorities and knowledge base of the Western system of mental health. With the continuing contested nature of psychiatric discourse and the work of psy-professionals, this book is a timely return to theorising the business of mental health as a social, economic, political and cultural project: one which necessarily involves the consideration of wider societal and structural dynamics including labelling and deviance, ideological and social control, professional power, consumption, capital, neoliberalism and self-governance. Featuring original essays from some of the most established international scholars in the area, the Handbook discusses and provides updates on critical theories of mental health from labelling, social constructionism, antipsychiatry, Foucauldian and Marxist approaches to critical feminist, race and queer theory, critical realism, critical cultural theory and mad studies. Over six substantive sections, the collection additionally demonstrates the application of such theoretical ideas and scholarship to key topics including medicalisation and pharmaceuticalisation, the DSM, global psychiatry, critical histories of mental health, and talk therapy. Bringing together the latest theoretical work and empirical case studies from the US, the UK, Australia, New Zealand, Europe and Canada, the Routledge International Handbook of Critical Mental Health demonstrates the continuing need to think critically about mental health and illness, and will be an essential resource for all who study or work in the field.

Military psychology has become one of the world's fastest-growing disciplines with ever-emerging new applications of research and development. The Routledge International Handbook of Military Psychology and Mental Health is a compendium of chapters by internationally renowned scholars in the field, bringing forth the state of the art in the theory, practice and future prospects of military psychology. This uniquely interdisciplinary volume deliberates upon the current issues and applications of military psychology not only within the military organization and the discipline of psychology, but also in the larger context of its role of building a better world. Split into three parts dedicated to specific themes, the first part of the book, "Military Psychology: The Roots and the Journey," provides an overview of the evolution of the discipline over the years, delving into concepts as varied as culture and cognition in the military, a perspective on the role of military psychology in future warfare and ethical issues. The second part, "Soldiering: Deployment and Beyond," considers the complexities involved in soldiering in view of the changing nature of warfare, generating a focal discourse on various aspects of military leadership, soldier resilience and post-traumatic growth in the face of extreme situations, bravery and character strengths and transitioning to civilian life. In the final section, "Making a Choice: Mental Health Issues and Prospects in the Military," the contributors focus on the challenges and practices involved in maintaining the mental health of the soldier, covering issues ranging from stress, mental health and well-being, through to suicide risk and its prevention, intervention and management strategies, moral injury and post-traumatic stress disorder. Incorporating enlightening contributions of

## Access Free International Handbook Of Psychiatry A Concise Guide For

eminent scholars from around the world, the volume is a comprehensive repository of current perspectives and future directions in the domain of military psychology. It will prove a valuable resource for mental health practitioners, military leaders, policy-makers and academics and students across a range of disciplines.

This handbook provides an evidence-based account of psychological perspectives on issues in music education and music in the community through the life course, exploring our understanding of music learning and participation across contexts. The contributors draw on multidisciplinary research from different cultures and contexts in order to set out the implications of music psychology for music education and music in the community. Highlighting the intersecting issues across education and community contexts, the book proposes new theories as well as offering important refinements to existing conceptual models. Split into six parts, it considers the role of music in society as well as for groups and individuals, and explores topics such as processing and responding to music; pedagogical and musical practices that support or pose challenges to the emotional, cognitive, social or physical wellbeing of learners and participants in a range of contexts; and ‘ music in identity ’ or ‘ identity in music ’ . With the final part on future directions and the implications for professional practice in music education and music in the community, the book concludes by exploring how the two sectors might work more closely together within a post-COVID-19 world. Based on cutting-edge research from an international team, this is essential reading for anyone interested in music psychology, education and community, and it will be particularly helpful for undergraduate and graduate students in music psychology, music education and community music.

This international handbook addresses classic mental health issues, as well as controversial subjects regarding inequalities and stereotypes in access to services, and misdiagnoses. It addresses the everyday racism faced by Black people within mental health practice.

Reflecting the work of an international panel of experts, the International Handbook on Psychopathic Disorders and the Law offers an in-depth and multidisciplinary look at key aspects of the development and etiology of psychopathic disorders, current methods of intervention, treatment and management, and how these disorders impact decision making in civil and criminal law.

This handbook presents a thorough examination of the intricate interplay of race, ethnicity, and culture in mental health – historical origins, subsequent transformations, and the discourses generated from past and present mental health and wellness practices. The text demonstrates how socio-cultural identities including race, gender, class, sexual orientation, disability, religion, and age intersect with clinical work in a range of settings. Case vignettes and recommendations for best practice help ground each in a clinical focus, guiding practitioners and educators to actively increase their understanding of non-Western and indigenous healing techniques, as well as their awareness of contemporary mental health theories as a product of Western culture with a particular historical and cultural perspective. The international contributors also discuss ways in which global mental health practices transcend racial, cultural, ethnic, linguistic, and political boundaries. The Routledge International Handbook of Race, Culture and Mental Health is an essential resource for students, researchers, and professionals alike as it addresses the complexity of mental health issues from a critical, global perspective.
