LABORATORY EXERCISE 23: Insect Sense Organs: Overview Nearly all mechanoreception, including hearing, is accomplished in insects by means of more or less modified macrotrichia (= setae), although the form of these setae may be greatly altered in the case of placoid sensilla, campaniform organs and chordotonal organs.

[The book] was prepared to be used with the textbook Hole's human anatomy and physiology ... As with the textbook, the laboratory manual is designed for students with minimal backgrounds in the physical and biological sciences who are pursuing careers in allied health fields. The [book] contains sixty-two laboratory exercises and sixty-one reports, which are integrated closely with the chapters of the textbook. The exercises are planned to illustrate and review anatomical and physiological facts and principles presented in the textbook and to help students investigate some of these ideas in greater detail ... The

Read PDF Laboratory Exercise 49 Organs Of The Digestive System

laboratory exercises include a variety of special features that are designed to stimulate interest in the subject matter, to involve students in the learning process, and to guide them through the planned activities.-Pref.

This concise, inexpensive, black-and-white manual is appropriate for one- or two-semester anatomy and physiology laboratory courses. It offers a flexible alternative to the larger, more expensive laboratory manuals on the market. This streamlined manual shares the same innovative, activities-based approach as its more comprehensive, full-color counterpart, *Exploring Anatomy & Physiology in the Laboratory*, 3e.

First multi-year cumulation covers six years: 1965-70.

"It's an ideal companion for Thibodeau and Patton's *Anatomy and Physiology*, Sixth Edition, as well as any standard anatomy and physiology textbook."--BOOK JACKET.
