has changed, especially in the disciplines of geomatics and geoinformatics. This revised and updated second edition provides a thorough understanding of the basic principles and techniques of GNSS, analyzes all four active systems, and explains clearly how each of these systems works. Because of its straightforward treatment of the subject, readers will gain an insight into the techniques, trends, and applications of GNSS and develop knowledge on selecting an appropriate GNSS instrument. Written for students and practitioners in geoinformatics, geomatics engineering, surveying, and remote sensing and GIS, this introductory and practical book includes questions and exercises in each chapter. Key Features:

- Furnishes detailed information on GPS, GLONASS, Galileo, BeiDou, and other regional and augmented systems
- Provides practical guidance for surveying, mapping, and navigation with GNSS
- Sheds light on the latest developments and modern trends of GNSS
- Includes a detailed glossary of related terms
- Contains many illustrations that complement the text
- Exercises for each chapter
- MCQ, solution manual for mathematical problems, and PPT as online resources

will make it even easier to learn how to use your Global Positioning System unit. The author has been involved with teaching people how to use GPS for many years. In this book he shares the answers to all the questions a novice might ask: What is GPS? How does it work? How accurate is it? Does it work anywhere? Is it for traveling on land as well as on the water? and more. Topics include: straight-line navigation, getting around obstacles, uploading maps and databases, entering waypoints, recording a breadcrumb trail, how to choose a GPS model and caring for your GPS. The step-by-step instructions are accompanied by illustrations and photographs. Actual GPS screens are shown as the user sees them on his or her unit while navigating. In addition to a glossary of GPS terms and definitions, this book has a list of popular manufacturers, a list of software sources and an Index.
