The emergence of relationship management as a paradigm for public relations scholarship and practice requires a close examination of just what is achieved by public relations--its definition, function and value, and the benefits it generates. Initiated by the editors' interest in cross-disciplinary exploration, this volume evolved to its current form as a result of the need for a framework for understanding public relations and the potential impact of organization-public relationships on the study, practice, and teaching of public relations. Ledingham and Bruning include contributions that present state-of-the-art research in relationship management, applications of the relational perspective to various components of public relations, and the implications of the approach to influence further research and practice. The

discussion conducted here is certain to influence and promote future theory and practice on the concept of relationship management.

Public Relations in India is a review of the history of Public Relations (PR) in the world and India and an in-depth critical analysis of the value of PR as an essential feature of the management function. The key focus of this book is what PR means for India and other developing countries in the 21st century. Building a case for citizen-centric public relations, the author argues that in India, PR must be viewed as a development tool geared towards socioeconomic progress. This argument is backed by case studies and practical examples of PR writing, PR concepts applicable to India and the latest techniques and gadgets used in PR practice. The book covers topics like Internal and External PR, Satellite and International Communication and Cross-cultural Communication and blends theoretical arguments with management case studies. The book aims to sensitize general readers as well as PR professionals about the increasingly socially responsible role that the PR function has to play in developing nations to help in all-round social uplift.

Public Relations and Social Theory broadens the theoretical scope of public relations through its application of the works of prominent social theorists to the study of public relations. The volume focuses on the work of key social theorists, including Jürgen Habermas, Niklas Luhmann, Michel Foucault, Ulrich Beck, Pierre Bourdieu, Anthony Giddens, Robert Putnam, Erving Goffman, Peter L. Berger, Gayatri Chakravorty Spivak, Bruno Latour, Leon Mayhew, Dorothy Smith and Max Weber. Unique in its approach, the collection demonstrates how the theories of these scholars come to bear on the understanding of public relations as a social activity. Understanding public relations in its societal

context entails a focus on such concepts as trust, legitimacy, understanding, and reflection, as well as on issues of power, behavior, and language. Each chapter is devoted to an individual theorist, providing an overview of that theorist's key concepts and contributions, and exploring how these concepts can be applied to public relations as a practice. Each chapter also includes a box giving a short and concise presentation of the theorist, along with recommendation of key works and secondary literature. Overall, this volume will enhance understanding of theories and their applications in public relations, expanding the breadth and depth of the theoretic foundations of public relations. It will be of great interest to scholars and graduate students in public relations and strategic communication.
