Steampunk often ends up being highly West-centric, somehow equating ‘ the nineteenth century ’ with ‘ Victorian London ’ . But there ’ s a whole wide world out there – and Steam-Powered: Lesbian Steampunk Stories does a damn fine job of exploring it. Not only is this anthology delightful in that its characters – its adventurers and ...

For a good idea of the Steam-Powered ethos, it ’ s worth looking at Amal El-Mohtar ’ s afterword, ‘ Winding Down the House: Taking the Steam out of Steampunk ’ . The argument is an important one: wanting steampunk to be all about steam robs much of the world, and many groups of people, of the chance to join in with everything that ’ s good about the genre – unless they corset their stories ...

The fifteen tantalizing, thrilling, and ingenious tales in Steam-Powered put a new spin on steampunk by putting women where they belong -- in the captain's chair, the laboratory, and one another's arms. Here you'll meet inventors, diamond thieves, lonely pawn brokers, clockwork empresses, brilliant asylum inmates, and privateers in the service of San Francisco's eccentric empire. Though they hail from across the globe and universes far away, each character is driven to follow her own path to independence and to romance. The women of Steam-Powered push steampunk to its limits and beyond. "From colonial India to New Orleans in slavery times, from a rogue San Francisco to the Lower East Side of old New York, these stories are thoughtful, wide-ranging, exciting, and often very, very sexy. Anybody who thinks that "steampunk" and "lesbian" are niche interests should read Steam-Powered and get their horizons seriously expanded." -Delia Sherman, Mythopoeic Fantasy Award winner and author of Through a Brazen Mirror.

The fifteen thrilling and ingenious tales take the familiar genre of steampunk in exciting new directions, following women from across the globe and through pasts that never were (but could have been) on their search for money, adventure, prestige, freedom, and the love of another woman. Here you'll meet a Moroccan airship engineer and an English diplomat who receive a cryptic message and an exploding music box, a librarian who doubts her God, a Malaysian shipping clerk who dreams of adventure, a terracotta bride from the Tenth Circle of Hell, and an aeronaut on her way to certain death and a surprising discovery, along with many more. Though they hail from across the globe and universes far away, each of them is driven to follow her own path to independence and to romance. The women of Steam-Powered 2 push steampunk to its limits and beyond.

In the first major YA steampunk anthology, fourteen top storytellers push the genre's mix of sci-fi, fantasy, history, and

adventure in fascinating new directions. Imagine an alternate universe where romance and technology reign. Where tinkerers and dreamers craft and re-craft a world of automatons, clockworks, calculating machines, and other marvels that never were. Where scientists and schoolgirls, fair folk and Romans, intergalactic bandits, utopian revolutionaries, and intrepid orphans solve crimes, escape from monstrous predicaments, consult oracles, and hover over volcanoes in steam-powered airships. Here, fourteen masters of speculative fiction, including two graphic storytellers, embrace the genre's established themes and refashion them in surprising ways and settings as diverse as Appalachia, ancient Rome, future Australia, and alternate California. Visionaries Kelly Link and Gavin J. Grant have invited all-new explorations and expansions, taking a genre already rich, strange, and inventive in the extreme and challenging contributors to remake it from the ground up. The result is an anthology that defies its genre even as it defines it.

The 2013 edition of the annual series showcasing the best tales of lesbian-themes fantasy, science-fiction, and the weird, includes such acclaimed authors as Jewelle Gomez, Nisi Shawl, Carrie Vaughn, and Brit Mandelo. The editors have ensured that a variety of voices and styles present imaginative fiction encompassing the love between women.

Presents a collection of essays looking at the social and cultural aspects of steampunk and its relationship to popular culture.

Captain Marta Ramos, the most notorious pirate in the Duchy of Denver, has her hands full between fascinating murder mysteries, the delectable and devious Deliah Nimowitz, Colonel Geoffrey Douglas (the Duke of Denver's new head of security), a spot of airship engineering and her usual activities: piracy, banditry and burglary. Not to mention the horror of high society tea parties. In contrast, Simms, her second in command, longs only for a quiet life, filled with tasty sausages and fewer explosions. Or does he? Join Captain Ramos, Simms and their crew as they negotiate the perils of air, land and drawing room in a series of fast-paced adventures in a North America that never was.

Playfully mashing up the romantic elegance of the Victorian era with whimsically modernized technology, the wildly popular steampunk genre is here to stay. Now...long live the revolution! Steampunk Revolution features a renegade collective of writers and artists, including steampunk legends and hot, new talents rebooting the steam-driven past and powering it into the future. Lev Grossman's "Sir Ranulph Wykeham-Rackham, GBE, a.k.a. Roboticus the All-Knowing" is the Six-Million-Dollar Steampunk Man, possessing appendages and workings recycled from metal parts, yet also fully human, resilient, and determined. Bruce Sterling's "White Fungus" introduces steampunk's younger cousin, salvage-punk, speculating on how cities will be built in the future using preexisting materials. Cat Valente's "Mother Is a Machine" explores the merging of man and machine and a whole new form of parenting. In Jeff VanderMeer's anti-steampunk story "Fixing Hanover," a creator must turn his back on his creation because it is so utterly destructive. And Cherie Priest presents "The Clockroach," a new and very unsettling mode of transportation. Going far beyond corsets and goggles, Steampunk Revolution is not just your granddad's zeppelin—it's an even wilder ride.

At the height of Britain's Industrial Revolution, steam power and magic join forces to create wonders the world has never seen. But those wonders have a dark side--one that will soon force a reckoning few could have anticipated. Half-demon Briar is content with her structured life as an archivist, a far cry from the chaos of her background and upbringing. Briar's simple and predictable existence is rocked when she discovers something sinister powers one of the grand, new inventions of her era. Isabella Castel, the only daughter of Viscount Sherard, is far from the brainless socialite she pretends to be. Isabella is everything Briar is not: passionate, creative and impulsive, but with secrets to rival even Briar's own. Two more unlikely partners should not exist, yet if the women cannot find a way to work together, they will lose far more than their reputations. Can a half-demon and a debutante work past their secrets before all hell breaks loose?

After her mother's mysterious death, a young woman is summoned to the floating city of Sky in order to claim a royal inheritance she never knew existed in the first book in this award-winning fantasy trilogy from the NYT bestselling author of The Fifth Season. Yeine Darr is an outcast from the barbarian north. But when her mother dies under mysterious circumstances, she is summoned to the majestic city of Sky. There, to her shock, Yeine is named an heiress to the king. But the throne of the Hundred Thousand Kingdoms is not easily won, and Yeine is thrust into a vicious power struggle with cousins she never knew she had. As she fights for her life, she draws ever closer to the secrets of her mother's death and her family's bloody history. With the fate of the world hanging in the balance, Yeine will learn how perilous it can be when love and hate - and gods and mortals - are bound inseparably together.
