This book is the original text by H. Igor Ansoff, the pioneer of Strategic Management'. This is the founding work on Strategic Management, a concept at the core of modern business. This book is a ground-breaking approach to modelling strategic capability and strategic choice that has influenced an entire generation of managers and strategists.

During the first half of the 20th century most American managers were trained to believe that simple solutions to business problems were the successful solutions, and that complex solutions were suspect. This conviction worked very well during the first half of the 20th century when the prescription for success was: 'make it as simple as possible'. This prescription will become dangerous during the turbulent 21st century when simple responses are guaranteed to fail. This book is written on a prescription for success offered by the renowned physicist Albert Einstein. Translated into managerial language this prescription states: MAKE THE ORGANIZATION'S RESPONSE TO THE ENVIRONMENT AS SIMPLE AS POSSIBLE, BUT NOT SIMPLER. Since the business environment of the 21st century is very complex, the readers should be prepared to cope with substantial complexity. This book offers the behind the scenes ways to cope with this complexity.
