Strategic Management delivers an insightful, clear, concise introduction to strategy management concepts and links these concepts to the skills and knowledge students need to be successful in the professional world. Written in a conversational Harvard Business Review style, this product sparks ideas, fuels creative thinking and discussion, while engaging students via contemporary examples, innovative whiteboard animations for each chapter, outstanding author-produced cases, unique Strategy Tool Applications with accompanying animations and Career Readiness applications through author videos.

Regularly considered to be the cap-stone course on any business or management degree, strategy has developed into a wide-ranging and sometimes overwhelming field of study. However, in recent years the theory of strategy has come under increasing scrutiny for its perceived failures and detachment from real world practice. With an engaging and conversational tone, this new concise textbook offers an accessible and timely review of the theory and practice of strategic management, explored from a more critical perspective. In a refreshing change from much of the literature, Richard Godfrey takes a wider view of strategy, incorporating insights from the worlds of sociology, psychology and history to highlight the complexity and plurality at the heart of the discipline. The book also incorporates a number of extensive case studies on contemporary business strategy from the likes of Apple, Nike, Zara and IKEA. Written for both an undergraduate and postgraduate audience, the book challenges a number of underlying assumption and beliefs about strategy and seeks to add clarity and context to the field.

Revised edition of the work, Strategic management: concepts.

Strategic Fashion Management: Concepts, Models and Strategies for Competitive Advantage is a highly accessible book providing a unique look into the strategic drivers of the dynamic and ever-growing fashion industry. Derived from the knowledge gap in quality strategic fashion management literature, this book blends theory with a variety of examples and uses 18 case studies to help bring to life contemporary topics faced by senior executives. The analysis is highly global in nature and aims to accelerate the strategic skills required to navigate the industry and contribute to a firm 's growth. Using copious examples from across the world, this book provides in-depth discourse and progressive theoretical concepts and strategies which readers will be able to apply immediately to their studies or practices. The book is particularly suitable for final-year undergraduate and postgraduate students studying fashion management or marketing, as well as those on MBA and international business courses who wish to understand more about the fashion ecosystem. It is also designed to serve as an important reference for executives who are interested in conceptualising strategic issues that are pertinent to the industry.

Nonprofit organizations in the U.S. earn more than \$100 billion annually, and number over a million different organizations. They face increasing competition for donor's dollars and many of the issues they confront are similar to those confronted by for-profit organizations. Strategic Management for Nonprofit Organizations applies powerful concepts of strategic management developed originally in the for-profit sector to the management of nonprofits. It describes the preparation of a strategic plan consistent with the resources available; it analyzes the operational tasks in executing the plan; and describes the ways in which nonprofits need to change in order to remain competitive. The book draws clear distinctions between the different challenges encountered by nonprofits operating in different industries.

Aiming to bridge the gap between theory and application, this work focuses on strategic management.
