"These books will support teachers in their understanding of designing process-based instruction and give them both useful lesson plans and a process for designing instruction on their own that follows the design principles." -Peter Smagorinsky, Larry Johannessen, Elizabeth Kahn, and Thomas McCann The Dynamics of Writing Instruction series helps middle and high school teachers teach writing using a structured process approach. Teachers may spread these books throughout a multiyear English language arts program, use all six books to constitute a yearlong writing course, or repeat modified sequences from one book at sequential grade levels so students deal with that particular genre at increasing degrees of complexity. Each book in the series includes classroom-tested activities, detailed lesson sequences, and supporting handouts. The instruction is detailed enough to use as a daily plan but general enough that teachers can modify it to accommodate their own curriculum and the specific needs of their students. The instructional activities in each book are tailored to a specific kind of writing: argument, essays that define, comparison/contrast essays, personal narratives, research reports, and fictional narratives. This six book series will show teachers how to: introduce issues, dilemmas, and scenarios that capture students’ interest and invoke the critical and creative thinking necessary to write powerfully and effectively design and orchestrate activities within an interactive and collaborative environment move students through increasingly challenging activities designed to help them become independent writers.

Engaging students in active learning is a predominant theme in today’s classrooms. To promote active learning, teachers across the disciplines and in all kinds of colleges are incorporating collaborative learning into their teaching. Collaborative Learning Techniques is a scholarly and well-written handbook that guides teachers through all aspects of group work, providing solid information on what to do, how to do it, and why it is important to student learning. Synthesizing the relevant research and good practice literature, the authors present detailed procedures for thirty collaborative learning techniques (CoLTs) and offer practical suggestions on a wide range of topics, including how to form groups, assign roles, build team spirit, solve problems, and evaluate and grade student participation.

Well established as a definitive text--and now revised and updated with eight new chapters--this book translates cutting-edge research into effective guidelines for teaching writing in grades K – 12. Illustrated with vivid classroom examples, the book identifies the components of a complete, high-quality writing program. Leading experts provide strategies for teaching narrative and argumentative writing: using digital tools; helping students improve specific skills, from handwriting and spelling to sentence construction; teaching evaluation and revision; connecting reading and writing instruction; teaching vulnerable populations; using assessment to inform instruction; and more. New to This Edition *Chapters on new topics: setting up the writing classroom and writing from informational source material. *New chapters on core topics: narrative writing, handwriting and spelling, planning, assessment, special-needs learners, and English learners. *Increased attention to reading – writing connections and using digital tools. *Incorporates the latest research and instructional procedures. See also Handbook of Writing Research, Second Edition, edited by Charles A. MacArthur, Steve Graham, and Jill Fitzgerald, which provides a comprehensive overview of writing research that informs good practice.

Preparing to Teach Writing, Fourth Edition is a comprehensive survey of theories, research, and methods associated with teaching composition successfully at the middle, secondary, and college levels. Research and theory are examined with the aim of informing teaching. Practicing and prospective writing teachers need the information and strategies this text provides to be effective and well prepared for the many challenges they will face in the classroom. Features Current—combines discussions and references to foundational studies that helped define the field of rhetoric and composition, with updated research, theories, and applications Research based—thorough examination of relevant research in education, literacy, cognition, linguistics, and grammar Steadfast adherence to best practices based on how students learn and on how to provide the most effective writing instruction A Companion Website provides sample assignments and student papers that can be analyzed using the research and theory presented in the text.

This smart, simple approach ensures that kindergarteners write at or above a first-grade level by the end of the year. Master teacher Randee Bergen shares her yearlong plan for daily writing, providing complete lessons and tips for motivating all learners, managing writing time, and assessing children’s work effectively and efficiently. Includes guided lessons for the whole group as well as individualized mini-lessons to support learners exactly where they need help. For use with Grade K.

Interactive Writing is specifically focused on the early phases of writing, and has special relevance to prekindergarten, kindergarten, grade 1 and 2 teachers.

Scientific English is possibly the most rewarding area of EFL teaching. It differs from English for Academic Purposes (EAP) as it is directed to a much smaller audience: PhD and postdoc students. Courses on Scientific English are held in universities throughout the world, yet there is very little support for teachers in understanding what to teach and how to teach it. This guide is part of the English for Academic Research series. Part 1 of the book sheds light on the world of academia, the writing of research papers, and the role of journal editors and reviewers. Part 2 gives practical suggestions on how to help your students improve their presentation skills. In Part 3 you will learn how to teach academic skills using nonacademic examples. Parts 1-3 are thus useful for anyone involved in teaching academic English, whether they have used the other books in the series or not. Part 4 suggests two syllabuses for teaching writing and presenting skills, based on the two core books: English for Writing Research Papers English for Presentations at International Conferences This book will help you i) understand the world of your students (i.e. academic research), ii) plan courses, and iii) exploit the What’s the Buzz? sections in the books on Writing, Presentations, Correspondence and Interacting on Campus. Adrian Wallwork has written over 30 books covering General English (Cambridge University Press, Scholastic), Business English (Oxford University Press), and Scientific English (Springer). He has trained several thousand PhD students from all over the world to write and present their research. Adrian also runs a scientific editing service: English forAcademics (E4AC).

As teachers today work in ever more challenging contexts, groupwork remains a particularly effective pedagogical strategy. Based on years of research and teaching experience, the new edition of this popular book features significant updates on the successful use of cooperative learning to build equitable classrooms. Designing Groupwork, Third Edition incorporates current research findings with new material on what makes for a groupworthy task, and shows how groupwork contributes to growth and development in the language of instruction. Responding to new curriculum standards and assessments across all grade levels and subject areas, this edition shows teachers how to organize their classroom so that all students participate actively. This valuable and sensible resource is essential reading for educators at both the elementary and secondary levels, for teachers in training, and for anyone working in the field of education.

Explains how faculty members can improve their teaching methods or how accounting units can improve their curricula/programs.

Provides research-based strategies for identifying and meeting the needs of students with disabilities, links best inclusive practices with content-specific curriculum, and helps educators fulfill IDEA 2004 requirements.
