law as a system based on the consent of national states is in the process of rapid adaptation to its new social preconditions, a variety of transnational regulatory levels compete for legal authority. In this process of change, there is more need than ever to guide the theoretical understanding because academic concepts have a crucial influence on the emerging practice of global law. This book highlights which choices are available and argues that global law requires taking a stand in mutually irreconcilable choices.

Shows that law it is often

protection, privacy and

A theme of growing  
importance in both the law  
and philosophy and socio-  
legal literature is how  
regulatory dynamics can be  
identified (that is,  
conceptualised and  
operationalised) and  
normative expectations met  
in an age when transnational  
actors operate on a global  
plane and in increasingly  
fragmented and  
transformative contexts. A  
reconsideration of  
established theories and  
axiomatic findings on  
regulatory phenomena is an  
essential part of this

discourse. There is indeed an urgent need for discontinuity regarding what we (think we) know about, among other things, law, legality, sovereignty and political legitimacy, power relations, institutional design and development, and pluralist dynamics of ordering under processes of globalisation and transnationalism. Making an important contribution to the scholarly debate on the subject, this volume features original and much-needed essays of theoretical and applied legal philosophy as well as socio-legal accounts that reflect on whether legal positivism has

anything to offer to this intellectual enterprise. This is done by discussing whether global and transnational cultural, socio-political, economic, and juridical challenges as well as processes of diversification, fragmentation, and transformation (significantly, de-formalisation) reinforce or weaken legal positivists' assumptions, claims, and methods. The themes covered include, but are not limited to, absolute and limited state sovereignty; the 'new international legal positivism'; Hartian legal positivism and the

that the only kind of  
metaphysics that can

Contribute to objective knowledge is one based specifically on contemporary science as it really is, and not on philosophers' a priori intuitions, common sense, or simplifications of science. In addition to showing how recent metaphysics has drifted away from connection with all other serious scholarly inquiry as a result of not heeding this restriction, they demonstrate how to build a metaphysics compatible with current fundamental physics ('ontic structural realism'), which, when combined with their metaphysics of the special

sciences ('rainforest realism'), can be used to unify physics with the other sciences without reducing these sciences to physics itself. Taking science metaphysically seriously, Ladyman and Ross argue, means that metaphysicians must abandon the picture of the world as composed of self-subsistent individual objects, and the paradigm of causation as the collision of such objects. Everything Must Go also assesses the role of information theory and complex systems theory in attempts to explain the relationship between the special sciences and

physics, treading a middle road between the grand synthesis of thermodynamics and information, and eliminativism about information. The consequences of the author's metaphysical theory for central issues in the philosophy of science are explored, including the implications for the realism vs. empiricism debate, the role of causation in scientific explanations, the nature of causation and laws, the status of abstract and virtual objects, and the objective reality of natural kinds.

Brexit will have significant

consequences for the country, for Europe, and for global order. And yet much discussion of Brexit in the UK has focused on the causes of the vote and on its consequences for the future of British politics. This volume examines the consequences of Brexit for the future of Europe and the European Union, adopting an explicitly regional and future-oriented perspective missing from many existing analyses. Drawing on the expertise of 28 leading scholars from a range of disciplines, *Beyond* offers various different perspectives on the future of Europe,

charting the likely effects  
of Brexit across a range of  
areas, including

institutional relations,  
political economy, law and  
justice, foreign affairs,

the idea of Europe itself.

Whilst the contributors  
offer divergent predictions  
for the future of Europe  
after Brexit, they share the  
same conviction that careful  
scholarly analysis is in  
need - now more than ever -  
if we are to understand what  
lies ahead for the EU.
