What makes places like Silicon Valley tick? Can we replicate that magic in other places? Discover the answers in this groundbreaking book from two of the world's leading experts at the intersection of venture capital and global development. Victor W. Hwang and Greg Horowitz propose a radical new theory to explain the nature of innovation ecosystems: human networks that generate extraordinary creativity and output. They argue that free market thinking fails to consider the impact of human nature on the innovation process. This ambitious work challenges the basic assumptions that economists have held for over a century. The authors argue that innovation ecosystems - what they call Rainforests - can only thrive when certain cultural behaviors unlock human potential. Their theory of the Rainforest is influenced by several breakthrough ideas in academia, including insights on sociobiology from Harvard, economic transactions from the University of Chicago, and design theory from Stanford. With an unorthodox and entertaining narrative, the book reveals the mysterious mechanisms of Rainforests. Furthermore, the authors provide practical tools for readers to design, build, and sustain new innovation communities. The Rainforest will transform the way you think about technology, business, and leadership.

Can Silicon Valley's culture inspire innovation in your organization? Could understanding its rules be transformational? Would a blueprint help you construct an ecosystem of innovation? Find out through The Rainforest Blueprint: How to Design Your Own Silicon Valley. It's a practical guide for putting the lessons learned from Silicon Valley to work in businesses, organizations, and communities around the world. It's the latest development in the Rainforest phenomenon that is now spawning innovation ecosystems on five continents. The Rainforest Blueprint is a do-it-yourself sequel to the 2012 book The Rainforest: The Secret to Building the Next Silicon Valley – the groundbreaking work by Victor W. Hwang and Greg Horowitz that explains the nature of innovation ecosystems like Silicon Valley: human networks that generate extraordinary creativity and output. They make the case that such ecosystems – which they call Rainforests – can only thrive when certain cultural behaviors unlock human potential, and they reveal the mysterious mechanisms of Rainforests. The Rainforest Blueprint by Victor Hwang, who is a Silicon Valley entrepreneur and co-founder of T2 Venture Capital, is designed for a different audience than the original Rainforest. Where the earlier book provides the theoretical understanding of how Rainforests work and the rules by which they operate, the Blueprint offers practical steps for putting those theories and rules to work in businesses, organizations, and communities. Sixty pages long – as compared to the earlier book's nearly 300 pages – The Blueprint provides – with stunning visuals and handy tools – the shared background needed for individuals to create together an innovation ecosystem in whatever setting they choose. It provides a common entry point into the world of innovation ecosystems – a shared starting point and a way to begin to create innovations that can be truly transformational.

Meg Lowman was determined to investigate the marvelous, undiscovered world of the rainforest treetops. Meg's perseverance and creativity allowed her to achieve this goal, but when this fantastic ecosystem started to disappear, Meg needed to act quickly. Meg Lowman was always fascinated by the natural world above her head. The colors, the branches, and, most of all, the leaves and mysterious organisms living there. As a scientist, Meg set out to climb up and investigate the rain forest tree canopies-- and to be the first scientist to do so. But she encountered challenge after challenge. Male teachers would not let her into their classrooms, the high canopy was difficult to get to, and worst of all, people were logging and clearing the forests. Meg never gave up or gave in. She studied, invented, and persevered, not only creating a future for herself as a scientist, but making sure that the rainforests had a future as well. Working closely with Meg Lowman, author Heather Lang and artist Jana Christy beautifully capture Meg's world in the treetops.

A look at the living things that call the rain forest their home.
